

AI

- Meaning Accuracy: 6
- Fluency: 5
- Terminology: 6
- Context: 5
- Style: 4
- Grammar/QA: 6
- Overall: 5,3/10

My PE

- Meaning Accuracy: 8
- Fluency: 9
- Terminology: 7
- Context: 8
- Style: 6
- Grammar/QA: 9
- Overall: 7,8/10

Example 1 - Terminology

- AI: tüketicilerin güvenliği
- My PE: tüketici güveni

Why I changed: "Consumer sentiment" was translated too literally. In this context, 'tüketici güveni' is more appropriate

Example 2 - Naturalness/Context

- AI: ekşi duygu okumaları
- My PE: zayıf tüketici güveni

Why I changed: The word "sour" was translated directly to Turkish. It creates an unnatural expression in this context. For this context 'zayıf tüketici güveni' is more suitable.

Example 3 - Contextual Disambiguation

- AI: Duygunun neden baskı altında kaldığını
- My PE: tüketici güveninin neden sarsıldığını

Why I changed: The word "depressed" was translated in a more psychological context rather than an economic context. My translation is more accurate in this context.
